# A CUNEIFORM TABLET FROM YUZGAT 

IN THE

## ancient language of cappadocia.

PART I: By T. G. PLNCHES.<br>PART II: By THE REV. PROFESSOR A. H. SAYCE.

## PART I.

'IHIS important document is part of a large tablet of fine clay, well baked, and of a reddish colour, inscribed with 45 more or less complete lines of writing on the obverse and 49 similar lines of writing on the reverse. The characters are small, being only about 2.5 mm . high, hence this large amount of text on the comparatively small surface which it presents. The height of the fragment is 154 mm ., and the width about 104 mm ., with a thickness at the top left-hand of 22.5 mm ., at the top right-hand of 37.5 mm ., at the bottom left-hand of 16.5 mm ., and at the bottom right-hand of 20 mm . The thickest part is therefore the top right-hand corner of the fragment as it now exists, and as this is the part nearest the centre, the original size of the document could not have been less than 31 cm ., with a width of 21 cm ., and may have been much larger, as we do not know at what point the thickness began to decrease. If it had two columns on each side, we probably possess rather less than a quarter of the original text; if three columns, rather less than a sixth. The style of the writing
is that of the tablets from Arzawa in the Tel-el-Amarna collection, and those acquired by Chantre in Asia Minor. ${ }^{1}$ The text of the obverse is divided into six paragraphs, and the reverse into eleren, each separated by a ruled line, except the fourth and fifth paragraphs of the reverse, which are separated by a double ruled line, probably in consequence of the list of offerings beginning here.

The seript used is the style of Babylonian cuneiform common in Asia Minor at the period when it was written, which would seem to have been somewhere about the fifteenth century lefore Christ. In general, the system is syllabic, the syllables being derived from the old SumeroAkkadian language of Babylonia, but certain of the words are written ideographically. It is these ideographs which have furnished the key to the document, and cnabled its nature to be roughly determined, for in all probability their meanings would have been unaseertainable had the words they represent been written syllabically.

In Professor Sayce's "Vocabulary" ${ }^{2}$ the ideographs here referred to find a place, so that it is not necessary to give a list of them, but a few remarks concerning them may be of interest. In the second paragraph (11. 2-11) these words, when followed by a possessive pronoun, have that pronoun in Babylonian, and not in the language in which the tablet is written, -ia, 'my,' and -ka, 'thy,' replacing the words $-m$ i, 'my,' and -ti, 'thy,' which, according to one of the tablets found at Tel-el-Amarna, would be the native forms. The remaining ideographs are those words which are generally expressed by that means in Babylonian and Assyrian in-scriptions--'son,' 'man,' 'mountain,' 'plantation,' ' wheat,' in the second paragraph ; 'king,' 'country,' 'ox,' 'sheep,' 'dog,' 'shepherd,' and two other words in para. 2 ; 'stone' in para. 3; 'gate,' 'brother,' 'great,' in para. 4; 'city gate' in para. 1 of the reverse; GU-HUR in para. 2 of the same; 'poor man,' and the numerals, in para. 33 of the

[^0]same ; and in paras. 5-11 a number of other words, including those for 'a wooden object,' 'wine,' 'wine-jar,' 'table,' 'precious stone,' 'lapis lazuli,' 'sweet cime,' 'sweet oil,' ete.; and throughont the text the names of the gods, except two apparently native deities, Telibinu and Hašammiliaš, are expressed by Assyro-Babylonian ideographs, to which the terminations of the language of the inscription are added.

It is the name of the Sun-god, represented in the transcription by the Sumero-Akkadian abbreviated form UT (for Utu or Utulii), which exhibits the greatest number of terminations. They appear as follows :-

UT'uš, rev., line 11.
UT-un, obv., 1l. 21, 22, and 26.
UT-i, obv., l. 22.
UT-šn, rev., l. 10.
UT-ma (?), rev., l. 48.
UT, without any termination, rev., 11. 5, 28, 42 (twice), 43, 45.

The name of Hadad or Rimmon, provisionally transeribed by IM, occurs with the following endings :-

IMI-ni, obv., 1l. 16, 34, 42.
IM-ša, obv., 11. 20, 23. LM-aš, obv., 11. 21, 38.

The gods Zagaga (god of war) and Lama or Lamas (winged bull, colossus) appear with one termination only :-

ZA-GA-GA-an, obv., 11. 25, 26.
LAMA(S)-an, obv., l. 27.
The apparently native divinity Telibinu occurs as follows :-
Telibinun, obv., 1. 29.
Telibinu, rev., ll. 35, 44, 48.
Telibinuša, rev., l. 9.
Telibimuia, rev., l. 4o.
Telibinu*ašsa, rev., l. 13.

In l. 43 of the reverse the termination (if originally existing) is broken away.

To the above forms may be added Gulašsan (? a native name, or derived from a Sumero-Akkadian god Gul ?) in the 32 nd line of the obverse, and Hašammiliaš in 1. 36. MAH (the Assyro-Babylonian 'Lady of the gods,' who aided Merodach to make 'the seed of mankind') appears without termination, obv., l. 32, rev., l. 11.

Besides being a singular termination (see IMI-as, above), -as was also used to form the plural, as is shown by the following common nouns :-

$$
\begin{aligned}
& \text { HURSAG (pl.)-aš, 'mountains,' obv., l. } 10 . \\
& \text { MARĒ (pl.)-aśs, 'sons,' obv., 1. } 42 . \\
& \text { AN (pl.)-aśs, 'gods,' rev., ll. 9, 10. }
\end{aligned}
$$

Other examples of -us as a singular apparently are :-KA-aš, 'gate,' obv., l. 33.
KA-GAL-aš, ' great gate,' ' city gate,' rev., l. 2. SII-aś, obv., l. 9.
Annamnaš, a woman's name, rev., l. 3.
The termination $-i{ }^{\text {s }}$ is found in the following ideo-graphically-written words :-

$$
\begin{aligned}
& \text { LU-is's, 'man,' obv., l. } 5 . \\
& \text { GAL-is', 'great,' obv., l. } 9 .
\end{aligned}
$$

There is apparently one example of the ending -es : NIN-eš, 'lady' or 'sister,' rev., 46.

One example of -ri: GAL-ri, obv., l. 35.
One example of -ria : GAL-ri-ia, obr., 1. 39.
These forms, GAL-ri and GAL-ri-ia, lead one to suppose that the word for 'great' in the language of the district where the tablet was found had $r$ as its final root-consonant.

In the remaining spelled-out words we have all the terminations of the words expressed by ideographs.
-uś: This is represented by abûs, obv., 37, 38; akkus, obv., 1. 18; h̆ukmâuš, rev., 37, 41; nuš (or gatarunuš), obv., 11.

Apparently terminationless words:-

1. Ending in -ar: dâr, rev., 5 ; mar, rev., $32,42,44$; piutar or uâtar, obv., 30 , rev., 19 ; uddar, rer., 8,10 ; uidâr, obv., 10 ; and the incomplete word $-\hat{a}$, rev., 2.
2. Ending in -ir: akir, obv., 33, 35 ; damengir, obv., 40 ; pầr, obv., 22 ; šeir (or šer), rev., 7.
3. Ending in -ur or -ar: ahhur (or alhhar), rev., 8 ; pahhur (or palbilur), rev., 36.
4. Ending in $-l$ : ammel, obv., 24 ; $\hat{u} l$, obv., 15, 19, 20, $22,23,37$, rev., 4, 8, 39.
5. Ending in -b: kukub, rev., 19. In rev. 32 it is followed by the plural sign.
6. Ending in -lum or -lim: These endings are preceded by the character for 'deity,' and it may therefore be surmised that they are intended to express the Assyro-Babylonian $\hat{l} / \mathrm{u}$ (or $\hat{i l i}$ ), in which case llm or lim would be the phonetic complement, nominative and oblique ease respectively, with mimmation. An-lum ( $\hat{i} h^{m}$ ) oceurs in line 35 of the reverse, and an-lim ( $\hat{l} l^{m}$ ) in the apparently Babylonian expressions pani $̂$ ilim (an-lim), rev., 36, 40 ; lêl $\hat{\text { îlim }}{ }^{m}$ (an-lim), rev., 37, 40; sulikal îlim (lalv (1n-lim), rev., 38.
i. Ending in -z : I-nu-li-az, rev., 36 ; ne(?)kilz, rev., 36.

It is possible that the majority of the words above classified (necessarily roughly) are noms, adjectives, and particles. Some, if not all, of the remainder, on the other hand, are to all appearance verbal forms, or words with pronoms added.
-mi : êšmi, rev., 3 ; mugami, rev., 10 ; nakdummi, rev., 15, 27 ; paimi, obv., 43 ; and possibly hahhimmi, obv., 38.
-at : isbut, ${ }^{1}$ obr., $26,28,37$; kišat (?), obv., 16 ; nat, rev., 24 ; murarat, obr., 4, (7) ; šat, rev.., 4.
-et : liêt, obv., 21, 25 ; linêt (or liueit), rev., 11 ; mutet, obv., 4 ; škêt, rev., 1,2 ; uretet, obv., 21 .

[^3]-it : aîsmit, rev., 6 ; lit or s̈alit, rev., 4 ; lupit (or kuêt), rev., 11 ; kuit, obv., 16,23 , rev., 8 ; pait, obr., 16 ; pâit, rev., 10 ; teit, obv., 16
$-u t$ : huišuut, obv., 44 ; tinut, obv., 8 ; timut, obv., 20.
-2n: drmein, obv., 39, 40 ; kuin, šagain, obv., 7.
It will thus be seen that the most frequent terminations are $-i,-\pi$, $-a s ̌$, and $-a n$, implying, in the case of $-t i$ and $-t u$, a force differing from that of $-a$ alone, and suggesting, for many of these classifications, more than one signitication. The recurrence of such endings as -izzi, -šizai, ete., also suggests grammatical formatives, but of what nature, our information does not allow us to state. Knudtzon is of opinion that (a)nki is a verbal ending. The termination $-m i$ or $-i m i$ he compares with the Greek $\epsilon \in \epsilon \in ;$-ess- as an infix he would render 'be thou,' 'mayest thou be '; -ma probably designates the dative; $-t i$ indicates the possessive of the 2nd person singular, -tin the same with an accusative singular. -ssi he regards as probably a dative singular feminine of a pronominal root, and $-\varepsilon a$ or $-s a$ a postposition. - $m n$, he points out, means 'to me,' and -mi expresses the possessive of the 1st person singular, -min being the same with an accusative singular (compare -tin, which is the same form in the 2nd person singular). -mis is the possessive of the 1 st pers. sing. with a dative or genitive. These points are fairly certain, and show some interesting peculiarities of the language.

Notwithstanding the points which are more or less certain, I do not feel myself justified in attempting a translation of this important inscription, knowing as I do the difficulties attending the rendering of inscriptions, even when the meanings of most or all of the words have been worked out. Indeed, doubt as to the signification to be assigned to a single word in a sentence (the others being absolutely clear) may cause a translator to miss the true rendering nine times out of ten, as anyone who has received a badlywritten letter in his own language-and who has not had this experience?-may easily understand.

Apart from the want of evidence as to the meanings of the words, there is often doubt as to their reading (as may
be gathered from the footnotes to the transcriptions), and also as to their divisions from each other, though in most cases the scribe has apparently denoted this by leaving a little extra space.

Obc., 1. 9. - - SIL-4s. The general meaning of the root is 'to cut,' hence it stands for almost everything which can be associated with that idea-hewing, reaping, separating, opening, deciding, judging, etc. It also stands for anything of the nature of a cutting, as a street, passage, roadway. Besides SIL, it has the values of tar, kut, hus, etc. - - also oceurs in 1. 42.

Line 10. For large things, such as mountains, countries (1. 12), or important things, such as the gods, one's relatives, or people, the plural sign used seems to be generally YKK, the Sumero-Akkadian character meš. For less important things, such as an orchard or plantation (l. 10), cattle, dogs, ete. (l. 12), it is the group $Y_{Y}^{Y}$, hiou.

Line 12 . The damaged character after the group transcribed KALBE $\bar{E}$ is possibly the native form of the Assyrian $\cdots$ ary (Ass. ŠLHÊ).

Line 13. The third character is apparently kiar, written in later Babylonian and Assyrian ANyY, not, as here, ※્夬yy. The character transcribed sum ( $\left.\begin{array}{l}\mathrm{z} \\ \mathrm{y}\end{array}\right)$ is doubtful, as this form could only have been developed under Assyrian influence. One would rather expect $\lll<r$, or, better, $\lll r r$.

Line 14. From the spacing, the character $\sim-Y$, an, belongs to the following word, gen, the group for 'talent,' also 'tribute.' I have not been able to hit upon the equivalent
 carefully written for this to be equivalent of the Assyrian

## 

Line 19. The seventh and eighth characters, which are written very close together, as though they formed a single group, may not be really $\operatorname{SH}_{y y}^{r y}$, tu-un, as the slanting wedges do not occupy quite the same position as in the cases
where -1 ，ut or $t u$ ，occurs elsewhere（see l．8，ti－mu－ut， for example）．Perhaps it is the Assyrian 〈慮界Y，dum．

Line 22．Instead of mal－zi，ga－zi is a possible reading for 开新婎．

Line 26．The various possible readings for $=1 \rightarrow$ other than iz－but are given at the foot of the page．

Line 32．From the writing Gul－ašstlu，and not Gu－la－ aš－šu－cun，it is possible that に延 has here another（ideo－ graphie）pronunciation．The archaic form of the character -1 ，mak，in this line is noteworthy ；in rev．，l．11，it is similar to that in use at a much later date．

Line 33．There seem to be traces of extra wedges in I，and in this case the character would not be $u \mathrm{~m}$ ，but ＇IIIT，DUBA，＇tablet．＇

Line 42．For the phrase SIL－aš kizai，see also l． 9.
Rev．，1．4．Though the two upright wedges in the seventh character are quite clear，they are written so close together that they suggest the character may in reality have been intended for $\overline{7}\langle\backslash, s ̌ a$ ，and not $t a$ ．The former reading has therefore been adopted．

Line 8．The character after kuit looks like $\mathbf{L}^{-}$，ah，but may in reality be $\boldsymbol{A}, ~ h i$ ，in which case it ought to belong to that word，and not to hur．
 Babylonian fry Texts from Babylonian Tablets，pt．xiv，pl．48，36331，1．14， was a rase for wine．The Semitic equivalent is šakaram， apparently meaning＇wine－jar．＇See the Amherst T＇ablets， p．22．The word gul，which seems to stand by itself，may be a preposition．The reading dam for 1 is based on the form in the next line，nakdammi，and on the differing
 of the obverse．

Line 16．The first word visible is possibly to be completed ［a－ri－im］－pa－as ；cf．l． 28.

Line 19．E $\leq 1$ is apparently the Babylonian I区，here written，like without its left－hand vertical wedge．

Line 22．For the first three groups，see the notes to l． 33.
Line 號．For read
Line 25 ff．The group $r^{2} y_{i}=1 \%$ ，written as though it were a combination of the characters for＇city＇（玉Y）and for＇bronze＇（三延）．It is generally rendered＇table，＇such as was used in the temples for offerings．

Line 26．In $w=y$ the final character seems to be the phonetic complement and rocal lengthening，and if this be the case，it would seem to confirm the identification of -1 with the Babylonian ，as well as the reading gir－ra．

Line 27 ．There is no doubt that the restoration of nagdammi in this line is correct．Compare ZABAR ana nagdammi aiggateš 1 GIŠ－GAL ZABAR in 1.15.

Line 29．The first word is apparently the Sumerian ideograph of Delitzseh＇s SA－GUL or AG－GUL＝aqqullu， ＇hatchet，＇Handuörterbuch，p．123．The meaning of the group is＇that which destroys．＇A sacrificial knife，howerer， is rather what would be expected，but this would not fit in the passages which Delitzsch quotes．We have probably to admit a modification of the meaning of the group in this non－Semitic text．The group $\bar{y} \vec{\gamma}$ is probably to be read as equivalent to the Babylonian $=1 \times$ ，Assyrian $=1$ 파 Its usual translation is sikiatue，＇plug，＇and if this be correct here，it may be supposed that the holes with which the sacrificial tables were provided to allow the blood of the victim，or other liquid，to rum away，was at least sometimes provided with the means of stopping that flow．At the end the last character but three may be $Y_{Y}^{Y}$ instead of $Y$ ，in which （ase the reading would probably be a－na ${ }^{\text {（god）}}$［Te－li－bi－nu］ （30）da－ct－i，＇dedicated to＇Telibinuš＇，but only the single wedge is visible．

Line 30．The syllable－ma at the end of the group Ey Ey＝＝1＝y is probably the phonetic complement of the word for＇table＇in the language of the tablet，and
would indicate the plural or dual in the case required by the preposition ana which precedes.

Line 32. Kus-edinna. This deity is possibly the Kašdimnam of the later Babylonian inscriptions, in which 'the deity of the drink of the plain' is represented by the chamaters for 'the deity of the drink of life,' who, unless feminine, would correspond with lacehus. It is doubtful which of the two is the original form. It may be noted that erina, 'the plain,' 'Eden,' was the place where the 'tree of life' grew. The character transeribed um (?) is damaged, and it is possible that the seeming wedges on the left are due to accident, in which ease it might be completed as EYYY, $u$, making the word uetenas. The two wedges at the end of the line may be part of $=\boldsymbol{Y}$ ( $q a-a b$ ).

Line 33. The use of the character , gala, 'great,' before ZAL-DUGA, EDINA, and ZAL-LU (or -UDU) here and in 1. 22, is noteworthy. In 1.22 it is preceded by the numeral ' 1 .' The probable meaning would therefore seem to be 'one large measure,' perhaps some recognized quantity. In l. 33 we may render these items roughly by 'the great measure of sweet oil, the great measure of field (-produce), the great measure of sheep fat,' or something not dissimilar. y, pa, at the end of the line seems clear, and after it there are traces which look like those of $\sim 4$, an. The final word is therefore probably liupan.

Line 35. $\rightarrow-y$ 位 is probably to be read itlut the AssyroBabylonian word for 'god,' with mimmation. Compare 11 $36-38$ and 40 .

Lines $36-38$ and 40 . 1 人 Assyro-Babylonian phrase pani $\hat{l} / i^{m}$, 'before the $\operatorname{god}(\mathrm{s})$,'
 phrases occurring side by side in 1.40 . This is confirmed by 1. 42 , which has of <t exyr, $\hat{l} l^{m}-i a,{ }^{1}$ ' my god,' immediately after the characters indicating the Sun-god. This suggests that the rendering, as far as $l \vec{a} i$, should be as
follows: ' 1 ig-gara-al for the Sun-god, my god, upon the table of the Sun-god presented.' The same phrase occurs again in 11. 43, 44, where, however, the name of the god Telibinu replaces that of the Sun-god. There would be room to restore $\hat{z} l^{m}-i a$ after Telibinu at the end of l. 43. Noteworthy is the use of ana for ina at the beginning of 1. 44 .

Similar inscriptions to the list of offerings contained in the last seven paragraphs of the reverse occur among the tablets found in Assyria, one of those containing parallel phrases being the British Museum text K. 164. The reverse of this inscription refers to salt offered before the Sun-god, to the fire which was kindled, to the portions of animals sacrificed, and to the jars of meal and grain included therein. Then, farther on, at 1.42 , are the words: "He shall install a table before the great goddess (or: great Anatu ${ }^{\mathrm{m}}$ ), a table before Gilgameš, a table before the sailors (or: the pilots), he shall offer water (and) oil, he shall set a lustral vase of drink (and) a lustral vase of wine before the great goddess (or: great Anatum) and before Gilgameš." The statements with regard to the offerings are much more elaborate in the Liverpool tablet, but it is not improbable that the Babylonian originals (for it may be supposed that such existed) of the seren paragraphs may ultimately come to light. This text implies that the word dâi, which occurs so many times in the Liverpool inscription, has some such meaning as 'is to be dedicated'; compare ll. 28 and following of the reverse.

There is one word of the inscription which, though one cannot state with certainty that it is of importance, deserves notice on account of the comection which it seems to have with other inscriptions, and which may, therefore, turn out to have more importance than at first sight. The word in question is $\hat{z} a n z i$, which occurs in the seventh line of the obverse. This word has been treated of at length by Fried. Delitzsch in his "Die Sprache der Kossäer" (Leipzig, 1884), pp. 29-38, on account of its occurring in the important Cossæan vocabulary discovered by Rassam in 1882. The word, which is there written ia-an-zi, is explained by the

Semitic šarru, 'king,' and Delitzsch shows in this work that it was not only borne by a certain Ianzû, son of Hanban, king of Nimmi, whose dominions lay in the neighbourhood of the Diyala, south-east of the lower Zab, but also by a king of the land of Nairi, which must have lain south-west of Lake Urumia. In both these cases Professor Delitzsch regards Ianzî as the native word for 'king' used as a proper name, and if this be the case, the Cassite or Cossean language was not only spoken in what may be regarded as its aboriginal home, but also in the tract north of Assyriaindced, its use may have extended still farther westwards, and included the distriet from which this and other tablets came, i.e. the neighbourhood of Boghaz-Keui.

This is not much to base a comnection upon, but it is necessary to mention the fact, in ease there should be anything in it. Another word to be noticed is iaš in 1.28 of the obverse, which, in Cassite, means 'the earth.' This, too, is probably only a coincidence, in which ease the two words have nothing to do with each other. ${ }^{1}$ It introduces the fact, however, that the termination -as was a common one in both languages, as may be seen by the word indaš, in the name Kara-indaš; Bugnš, the name of a god, found in the personal name Nazi-Bugaš; clakaš, 'star'; kadaš, 'help'; hardaš, in the royal name Kara-hardaš; miriaš, 'earth'; Ubriaš, the god Hadad or Rimmon as 'Lord of the lands,' also, apparently, pronounced Buriaš ; simmaš, 'ehild '; Śuriaś, the Sun-god, as the šuri (probably 'light') of the land; Marattaš, the god Nirig; and probably others. Besides these, there is a number of words with varions terminations, which may be classified thus:-

Ending in -u: ašlulu = Assyro-Babylonian babbû ; ilutu, 'heaven'; bar-ȟu, 'head'; bašḩu, 'god'; hameru, 'foot';

[^4]naśbu, 'man,' 'being,' ' life' (?) ; saribu, 'foot'; Sithu, the god Merodaeh.
In -a: burna, 'protégé'; Kamulla, the god Ea or Aa; kukla, 'servant'; turuluna, 'wind,' 'storm'; Hala, the goddess Gula; Hudlha or Hulabha, the god Hadad or Rimmon; nula, 'king'; Simalia or Šmalia, the goddess of the mountains; Sugamuna, the gods Nergal and Nusku; Šugurra, the god Sutiria; zinbina, the Assyro-Babylonian zina or zêna.

In -i: dagigi, 'heaven'; kašakiti, in the name Kašaktiianzi, ?'Kašakti is king '; Hali, the goddess Gula; Harli or Harbê, the god Bel; šagarakti, 'redemption'; mali, 'man'; naぇi, 'shadow,' 'protection'; mêli, 'servant'; ianzi, 'king.'

Various consonantal endings: aśrak or ašs al, 'wise '; ulam, 'ehild '; bu' (or buri), 'lord,' in the name 'lord of the land'; Gudar, the god Nirig; Lur, the god Nergal; Dun (or Duni) in the name of Kar-Duniaš (Babylonia); Kưr. (or kara), in the same name, unless it be Semitie ; llustmar = Assyro-Babylonian kasusu; Mirizir, the goddess Beltis; Sah, the sun, the Sun-god ; sir, 'bow' (for shooting) ; Sugab, the god Nergal.

Verbs: usib, 'to protect,' 'spare'; eme, 'to go forth '; saribu, 'to hang up'; nimgirab(i), 'to protect,' 'spare'; šimad (?), ' to give.' ${ }^{1}$

From this it would seem that, in Cassite, there are four nominal endings, $-\left(s s_{s},-n,-a\right.$, and $-i$ (eompare pages 4-7). The infinitives of the verbs seem to be either terminationless or end in $-i$ or -11 . Nouns ending in another consonant than $s ̌$ are rare.

Notwithstanding that there is no indication in the translations that any other word than the nouns are contained in kadušman and šagaraliti, yet it would not be impossible that the final syllable of eaeh, -man and $-t i$, are pronouns. In this case liadas'-man would stand for 'my help,' and

[^5]stagarali-ti, 'thy redemption.' One of the names in which they oceur is Kadasman-Turgu, which would then be equivalent to the Babylonian Tuknlti-Bêl, 'my trust is Bêl,' ${ }^{1}$ whilst the other, that contaning sttyuruliti, is Sagarakti-Burias, which, if we accept the identity of Cassite and the language of this tablet, would be 'thy reclemption is the lord of the lands,' i.e. the god Rimmon.

In this comection it is worthy of note, that the name of the Sun-god, -y $\boldsymbol{4}$, is not followed by the termination -aš, implying that the name used to indicate him was Suly, and not Suriaśs, whilst the name of the god Hadad or Rimmon, - y has in two cases that ending, implying that the name used for this deity was Ubrias or Burias', and not Hulalylua or Hullya.

It is naturally a great pity that we do not possess the material to carry this comparison to a definite conclusion, but the reason of this will casily be muderstood when it is stated that the Babylonian list of Cassite words was simply drawn up to explain to the Babylonian seribes the meanings of the names of the Cassite kings who, at various periods between 1400 and $11 \% 0$ b.c , ruled the country, though many Babylonian names are interspersed among those which are pure Cassite.

Naturally, in a wide extent of country implied by the position of the Cassites on the east and the Arzawites on the north-west, the existence of a certain mmber of dialects would be unaroidable, and this would account for any differences in the forms of the words which may occur. But, as already pointed out, there may be no comection linguistically between these districts at all, notwithstanding the likenesses between the two idioms, which, however, when we take into consideration the small amount of material available, are momerous enough to make a comparison desirable.

[^6]But the presence of Kassites in the extreme west of Asia may be regarded as provable historically-they are apparently the Kašsi, Kaši, or Kasi of the Tel-el-Amarna tablets, who have been identified with the Kusâa or Cappadocians of the later Assyrian texts. In Tel-el-Amama 58 of Winckler, Rib-Addi of Gebal speaks of Abdi-aširta, calling him a dog who sought to take all the cities of the Egyptian suzerain "for the king of Mitana and the king of Kašši." In No. 86 it is Abdi-aširta's sons, who are " dogs of the king of Kiassi and the king" of Mitami (Mitana), and take the land of the king for them." The letter numbered 8 I likewise treats of the same theme, but speaks of the taking of the king's cities by the sons of Abdi-aširta as an accomplished fact-" [dogs] of the king of Mitana are they, and of the king of Kasi, and of the king of Hata." There are also Kassites, however, among the merecnaries for whom he asks to defend Gebal in letter No. 97 (London 24) -anēlut màtãti haši, ' men of the lands of Kaši. Akizzi of Qatna also speaks of them in No. 173. Abdi-hiba or Ebed-tôb of Jerusalem (No. 180) does not wish to be in any way identified with them-Amur šarul bêlía şaduq ana iầsi aššur'u auēlut háš̌i, ' lehehold, O king my lord, I am faultless concerning the men of Kaši'; apparently they were spying out his lind: "There are men of the land of Kaši in the midst of my house." Finally, we get a glimpse of former times in Winckler's No. 181, in which the same ruler of Jerusalem says that "as long as there were ships in the sea, the arm of the mighty king took the land of Nabrima (Naharaim) and the land of Kašsi," implying that he not only took them, but held them aliso.

The mention of the land of Kasi with Mitana and Hata (Kheta, the land of the Hittites) shows its close conncetion with those districts, whilst the other references testify to its power and importance. The mercenaries mentioned by RibAddi had probably thrown off allegiance to their king, unless, as is likely, they were his agents.

It will probably be admitted that the seeming confirmation of the indications of the Kassite vocabulary by the Tel-el-

Amarna tablets is striking, and worthy of careful comsideration. ${ }^{1}$ Other possible Kassite names therein are Bawanamaš, Biridaşa, Kasì (messenger of Amenophis 111), Sindi-s̆ugab (messenger of Burra-Buriaš, king of the Kassite line in Babylonia), and probably others.

## APPENDIX.

WINCLIER, 10: Bulag, 28185.
Tramscription and translation of the letter from Amenophis III to Tarhumdaraba, king of Arzawa, based upon Knudtzon's greatly improved text and rendering ${ }^{2}$ :-

1. [U]mma Ni-mut-ria šurru rabû šar mât Miṣsari
2. [a] na Tarbundaraba šar mât Arzawa kibe-ma :
3. Katti-mi DMQ-in BİT-IIIA-mi DAM-MES-mi TUR-MES゙-mi
4. awêlu-meš GAL-GAL-ıš Z/AB-MEŠ-mi imern KURRA-HLA-mi
5. bibbit-mi KUR-KUR-HIA-mi kan anda
6. hûman DMQ-in.
7. Thus: "(It is) Nimutria, the great king, the king of Egypt
8. to Tarhundaraba, king of Arzawa," say then. ${ }^{3}$
9. It is well with me-(with) my houses, my wives, my children,
10. my great men, my soldiers, my horses,
11. my chariots, my countries every one (?),
12. it is very well.
[^7]
## 7. Duqqa kat-ta hûman DMQ-in êštu

8. BIT-HIA-ti DAM-MEŠ-ti TUR-ME GAL-aš
9. ZAB-MIES゙S-ti imeru KUR-RA-HIA-ti bibbit-ti
10. KUR-HIA-ti hûman DMIQ-in êštu.
11. Likewise (?) with thee may it be very well-
12. (with) thy houses, thy wives, thy children, thy great men,
13. thy soldiers, thy horses, the chariots,
14. thy country, may it be very well.

## 11. Kâšmatta uienun Iršappa

12. awelu halugatallan-min an mani TUR-SAL-ti
13. ̂̂lu UT'-mi kuin DAMI-anni uwadanzi
14. nušši lilhuwî šaman rêsi
15. kâšmata uppahhun 1 subahalia GUSKI-aš
16. DMIQ-anta.

## 11. To thee have I sent Tršappa

12. my messenger, to say, "'Thy daughter
13. for my Sun-god, ${ }^{1}$ when is she to be handed over as his wife?"
14. Now may there be given to her oil for (her) head!
15. To thee have I caused to be brought a golden goblet
16. as a gift for thec. ${ }^{2}$

[^8]17. Aniattaš ma-mu kuedaš hatrā̄[e]š

Remainder minscribed.

Nome.-In the preceding pares the "one sound, one letter" system is used$h_{h}=\dot{\tau}, s=\mathfrak{Y}, \dot{s}=\dot{\varkappa}, s=0$, ete. In l'art II. Professor Sayce uses $h h, t s$, $s$, and $s^{\prime}$, for these four soumls.

## PART II.

The remarkable and important cunciform tablet from Yuzgàt, a copy of which is here published, I had the good fortune to obtain in the Spring of 1905 . It is now in the possession of the University of Liverpool, where it has been skilfully cleaned. Dr. Pinches and I have spent several weeks in making the copy, he working from the original and I from enlarged photographs, which in most eases are as clear as the original, if not clearer; the result of our combined efforts is a text in which there are very few eharacters which can be considered doubtful.

Yuzgat is so near Boghaz Keui - the early eapital of Cappadocia-and the language and script of the tablet are so exactly those of the cunciform tablets found on the latter site, that we may conclude it was really found there, like the Hittite seals which have also been brought from Yuzgât or the gold figures bought there by M. Chantre. There are no remains of antiquity at Yuzgât itself, while the momed of Orta Eyuk to the south yielded no tablets to M. Chantre's excavations, and that of Topak 'Tepé to the north is mexplored. Where the copper mentioned in the tablet came from it is impossible to say ; at present it is brought from the Argana Maden and other coppermines to Tokat. About thirty miles from Yuzgât, in the Ak Dagh, there are extensive mines of argentiferous lead.

The seript and language of the tablet are identical with those of the two tablets from Arzawa diseorered at Tel elAmarna, the corrected texts of which have been published by Dr. Knudtzon (Die avei Arzaca-briefe, Leipzig, 1902). We now know, therefore, where Arzawa was, whose king corresponded with the Egyptian Pharaoh, and from whence came Labbaia, who afterwards played such a prominent part in the politics of Canaan. Indeed, so exact is the
resemblance between the seript, rocabulary, and grammar of the Arzawa and Yuzgât tablets that it is difficult to avoid the conclusion that they belong to the same period as well as to the same locality. On the other hand, the tablets found at Boghaz Keni, of which Dr. Pinches has made revised copies, are also in the same seript and language.

The kingdom of Arzawa would consequently appear to be that of which Boghaz Keni was the capital, and which extended across the Halys southward along the Sarus into Cilicia. But this is not all. In A. ii, $16,17,{ }^{1}$ we read Khat-at-ta-(n-nat-as SAR-us, where it has long been recognised that we have 'the Hittite king'; this is followed by -di (?)-na-as-ta AN-UD-us, 'the sum-grod in the land of . . . The lost characters can now be supplied from the Yuzgât tablet. Here (Rer. 38) we read: BIT-ILIM Kha-at-di-na-as-ta, 'the temple of the god in the land of Khaddi,' or perhaps 'in the temple of the Khaddi-land,' where the constant interchange of the surd and sonant in these tablets allows us to identify the word with the Assyrian Thatti-nâ, 'the Hittite land.' ${ }^{2}$ In one of the Boghaz Keni tablets (Chantre, i, Obr. 16) reference is made to 'the city of Khattu-sipa,' and we are therefore justified in concluding that Arzawa was probably in the land of the Hittites-in other words, that my old contention was right that the Iittites originally eame from Cappadocia, and that in the fourteenth century в.c. there was a Hittite empire which stretehed from the west of Asia Minor to the borders of Palestine.

It is accordingly not surprising that the language of the Fuzgàt tablet resembles that which my decipherment of the native hicroglyphic inscriptions has bronght to light. The resemblance is not so exact, howerer, as in the case of the Arzawa texts; and the differences may be due either to dialectal variety or to the imperfections of the hieroglyphic

[^10]system of writing and to the consequent difficulty I have found in always transeribing it correctly. There are certain indications which make me think it probable that the language of the hieroglyphic inscriptions was that of the Hittite country of Kas, which was perhaps south of the Halys, the language of the tablets that of the Hittite country of Arzawa.

As in the Arzawa tablets, so, ton, in the Yuzgât tablet, Assyrian words and expressions are intermingled with the native words, native grammatical suffixes being sometimes attached to them. Even prepositions like ana and istu have been borrowed from Assyrian. Assyrian influence must have been strong in Cappadocia; the tablet and cuneiform script were themselves derived from the Assyrian colonists in Suri, and the so-called Cappadocian tablets from the sites of the Assyrian colonies at Gyül Tepé and Kara Eyuk are in Assyrian, into which, as is natural, native words are occasionally introduced. Similarly, I have found Assyrian words in the hieroglyphic texts.

Thanks to these Assyrian words and the use of ideographs, as well as to the fact that the formulie and general tenour of the two Arzawa letters are known from those of the other tablets in the Tel el-Amarna collection, it is possible to decipher to a certain extent the Arzawan language, to determine the meaning of several of its grammatical forms and of some of the words in its rocabulary.

In the following commentary on the Yuzgât text it will be seen that I have called all these sources of information to my assistance, not forgetting the Boghaz Keui tablets or the hieroglyphic inseriptions:-

## Obverse.

2. Perhaps we shonld read tu-el; ef. 10 and A. i, 24. Marê-ka, 'thy sons,' is Assyrian.
3. The first character may possibly be $z i$, the last possibly $s$ su but they are too much broken for certainty. AN-IM-as amu NIN, 'Sandes to (Ass.) the lady.'
4. A. ii, 1 begins: [mu? ? 1 -tu-mu lii-[i] [te? ?]-it Lal $b$-ba-ya, 'to my lord (atn and atu in the hieroglyphic texts) thus says L.' The signification of kit, which is borrowed from Assyrian, is pretty clear in the Yuzgât tablet (see, e.g, Obr. 16), and the upright wedge of te still remains. We learn from this passage that $t$ denotes the 3 rd pers. sing. of the present tense. The maning of the preposition $m$ (from mus, 'gift') was already known from the Arzawa texts. Wirrat or warad recurs in A. i, 18. The termination is the plural suffix, as has long since been evident from a comparison of the singular libbi, 'chariot' (A. i, 28), with the plural bibbit or bibbiel (A. i, 5). As the sentence in which the word is found begins with aniya-t-tas, for which in A. ii, 5 we find DUP (?)-yat, 'tablets,' its signification seems fairly obvions. I would suggest the following translation for the whole sentence: amiynat-tas ma-mat kuedas kilutrâes ubbi warat-mu neitta uppalillili EGIR-an-da, 'Thy letters unto me, being friendly, the former ones, I received; my answers to you I wrote (or despatched) afterwards.' Here I suppose neitta to be equivalent to mutta, nit and nê similarly interchanging in the hieroglyphic texts, from which I take the explanation of ma in ma-mu. Hence mu-ucu-ra-at-mu to-it will be 'to my answers he replies.'
5. Probably $\begin{aligned} & \text { anut } \\ & \text { is to be supplied: [anu] marê-y/a SUM-MA }\end{aligned}$ AMIL-is, 'to my sons the man gare'; limnanaa, which is a datise case and follows the ideograph of 'sheep' in the next line, may be 'for a deposit,' 'for security.'
6. Nus is a nom. or ace. plural. From l. 12, nû-ZUN (i.e. wiss), we gather that it signifies 'gift.' Nan is the ace. sing. of the demonstrative nas found in both the Arzawa and the hieroglyphic texts; cf. A. ii, 15.
7. Read [ $n=1$ wa-]ra-at marêka, 'to the amswers of thy children.' The ace. leni-n recurs in A. i, l3. The
nom. liki-s is frequent, e.g. A. i, 24, and we have the 3od pers. sing. of the verb lati-t in 11 . 1 (i, ete. In Rer'. 19 we read III DUK kulab istu IIT PU-ZUN wa-a-tur liu-it-ta, where the ideographs and Assyrian words ' 3 jars with 3 perforated stands' oblige us to reuder the two concluding Arzawan words 'provided (mamufactured) underneath.' Hence kuiltu must be a passive participle corresponding to the Lat. factus, 'constituted,' and the original sense of lilli will be 'to be made,' 'to be.' This sense exactly suits its use wherever it is met with. Thus in 1. i, 12, 1:3, TUR-SAL-ti AN-CD-mi kuin DAMami would be thy danghter being for the wife of my. Sun-god'; in A. i, 23, '24, 'my messenger being (really) a (?) messenger.' Kini may be the passive form of kai, which in the hieroglyphic texts signifies ' to make.' Knin is here in agreement with Sargain, i.e. Sitgais, perhaps a proper name. For iya-nzi see i!y-zi, Ret. 39, though -nzi is more probably a rerbal suffix.
8. Uchee or utne is found again in l. 20. The next word is ki/hr-u-ma-an, which, as Dr. Kinudtzon has shown, siguifies 'abundance.' From l. 10 it is clear that midar is 'together with,' 'and.' Wätur, 'underneath' (for which see above), is another adverb of a similar nature ending in -tar. So also is udder ( $R, c, 5$ ). Tinut and lihatnut (which may be read khalamut) are cither plurals in -d or 3rd persons singular of the verb. From l. 11 we may gather that timu-, timuis either the equivalent of the Ass. ibsi, 'he is,' or a word signifying 'to write,' or the like. Hence we may translate the line 'on a tablet the whole he records and seals (?).' In any case utne is the equivalent of lie; see 11.11 and 41.
9. Khalikihi-mas is a proper mame ; in line 37 he is called 'father Khakhkhimas.' From my decipherment of the hieroglyphic texts it follows that GAI-is, 'the chief,' should be read wris. Khumcom-ti, an accusative
(from root k/nu) with suffix 'thy,' perhaps 'thy husband.'

Ana aklii-su, Ass., 'to his brother.' Line 42 shows that we must read SIL-as-KI-iz-zi. This is like KHAL-as-KI-iz-zi in Belek, 6. As would be the suffix of the plural; in A. i, 25, we have MAT-ya-as, 'belonging (pl.) to the land.' The meaning of the suffix iz-si is given us in Rer. 40 : pani ilim-rz- i, where it is either the equivalent of the Ass. pani, as in Rev. 36, or less probably of ina (pani), 'in (the presence of).' Hence in Chantre, i, Obv. 16, 17: ma-a-an AT-us D.P. A-ri-in-na-aś D.P. Khu-at-tu-si$p a-i z-z i m u$ AMEL GIS-PA la (or as-su)-li zir-ri-di-is-sa-an khal-sa-a-kis (?) will be, 'This I the king of Arima in the city of Khattu-sipa to the secretary have sent, apportioning(?) (or collecting? ) it among (?) the eities'; and in Chantre, i, Obv. 3, we similarly have D.P. Kha-iz-zi, 'in the city of Kha.' In the hieroglyphic text of the Mer'ash lion (1. 5) kasma Sandu-c--izsi ammi is 'for the land of Sandes.'
10. KIIAR-SAG-MES-as wi-dâr GIS-SAR-ZUN, 'forests and gardens'; uellu is perhaps the termination of the word for 'gardens.' Nu-tuel . . . , 'to' or 'for' tuel ('conveyance'?), which is fomed in A. i, '2 4 , 'to thee . . . my messenger . . . has conseved (?) (tuel-uit) these aggas.'
11. Warsulas is an ace. pl. agreeing with SE-MES ; perhaps 'cultivated lands.'

Pais is a participle, like la-is, 'making', and other similar participles in the hieroglyphic texts. In Rer. 19, muttu I LU p $\hat{a}-1$,' 'to thee one sheep I will give,' pâ-u takes the place of the ideograph SUM in 1.45 , and consequently its signification is fixed. Gatare seems to be the $\Lambda$ ss. qutriu, 'a present.' Hence the whole passige will mean: 'giving for a present to his brother in the comntry forests and 'gardens for conveyance (?) (and) cultivated (?) lands.'
$N u{ }^{s}$ is a plural which is written mi-ZUN in the
next line, where the context shows that it must signify 'gifts.' Li-e recurs in l. 41, where it is followed by e-ib-si, i.e. the Ass. ibsi, 'it is.' The word is also found in Sch. i, Obr. 7. I believe it is the Ass. lie, 'a document,' in which case timn . . . , which follows, will be 'recorded,' 'written,' or the like.
12. 'The gifts to the divine king of the world, oxen, sheep, dogs, mules (?), recorded.'
13. In the hieroglyphic texts $-s-m a$ means 'of' or 'from' such and such a place; KHAL-KI-us is a plural; hence the three first words of the line will be 'the sons of the eity of Kartas,' possibly the Semitic qereth, qiry, /ath. Cf. the Arm. kert. ${ }^{1}$

The suffix of timnu seems to be $-z i$, which is followed by SUM-MA, ' give.'
14. AN seems to be separated from mumasta; otherwise we might read 'a talent in weight.' In Sch. i, Obr. 6, $v_{a}$ is inserted between NAM and ERU, 'bronze.' The line may mean: 'in addition a sacred talent of bronze in weight (?) by way of interest,' KHAR being an ideograph.
15. $\hat{U} l$ is shown by the Arzawa tablets to be a particle signifying 'verily;' 'indeed,' and we may gather from A. ii, 6 that it is used to give a past sense to the verbal form to which it is prefixed. Hence we may translate here 'the gifts have been registered,' literally ' for registration.'

Mân, or bân as it is also written, would have been pronomeed uân; it follows from Chantre, i, Olr. 14, that it is the aceusative of the demonstrative, 'this.' Kuitta in Rer. 19 is a pass. part. 'made '-' 3 jars made with 3 holes below.' Khuman (or rather lihuran) is 'abundance,' 'abundantly': see 1.8 , 'this being in abundance.'

[^11]16. Pait, 'he gives,' as in Sch. i, Obr. 10, while Rer. 10 shows that it is also 3rd pers. plural. Perhaps apa $\hat{a}-$ $s a$ is 'all of it.' AN-IM-ui corresponds to Sumda-ni, 'to the Sandanian,' in the hieroglyphic texts. Kî̀ is Assyrian, as is also lisalt, 'property,' and we may accordingly render 'to the Sandanian he declares (or they declare) that it is (kuit) the property of
17. Te-izzi, 'at the word,' 'by order.' Ami-ssi may be the DAM-ami, 'wife,' of A. i, 13 , but is more probably 'mother,' and atti may be 'father,' while -si is the feminine possessive pronoun of the 3rd person. Asi in the hieroglyphic texts means ' of the shrine.' Hence we must render: 'To the Sandanian(s)'-i.e., as the hieroglyphic texts show, the people of the land of Sandes-'says Khakhkhimas that it is the possession of the sanctuary according to the word of her father and her mother since they loved (?) (akizins) law and justice'; sce note on next line.
18. Kittani is probably comected with littat, 'is faithful,' from the Assyrian littu in A. ii, 6. Azzilkitani, with which it is coupled, has also the appearance of being an Assyrian word. In the Cappadocian tablets of Gyül Tepé rab zikîtiom is 'judge' or 'ehief magistrate,' so that the words would seem to signify 'law and justice.'
19. Kab-bu-uta-at-tin ma-wa-a u-ul liu-it-ki, 'thy
as it was here (?).' Kablu may be the Ass. qabu, ' a stall,' and mori $\hat{a}$ is an adverb, the reading of which is given in Rec. 11, though it is possible that the first character may be intended for kin rather than ma.
20. The suffix -sa apparently denotes a genitival relation ; sce Rer. 13. But it may be a rocative. Sakki, on the analogy of assul-i, '1 sent,' would be a 1 st pers. sing., but may also be imperative. As kabburat-tin is an ace., timmet will be the 3rd pers. sing. like pait, trit, kittut: 'thy liatbun, as it is here (?), the shepherds and oxherds, all of it he (Khakhkhimas) registers
on a tablet: to Siandes I (?) have dedicated (?),' or perhaps, 'O Sindes, hear (\%).'
21. Bi-i-e-it is the Iss. bit, 'house,' and in Sch. i, Obr. 1 and Rer. 1, 6 , interehanges with BIT. In the two last passages it is preceded by the determinative of divinity, and in the first and last is followed by $i$-id-din as here. $I$-id-din must be the Ass. iddin, 'he has given,' to which the Mittite suffix -ua is here attached. Is the meaning' 'Sandes who has given the temple of the Sun-god' or 'to the Sun-god'? The prefix woa in worateit is found in A. i, 13, 21, 2.2, where a natural translation would be 'in order that.' Here, however, the accusative IN-UD-un implies that it is equivalent to a preposition compounded with a verb in the Indo-European languages, ume-teit being'something like 'ealled to,' 'addressed.'
2.). Santhies is a pres. part. which occurs in A. ii, S, where the construction is similar to that here. BIT-zi-muan is an ace. of an adj. in -na agrecing with $A \mathrm{~N}$ -CD-un; perhaps 'the Sun-god of the land of the House of Life.' Uemiga is a formative in -mi(ya) like assu-miya (A. ii, 11), ladi-miya, and the suffix recurs in assu-mi-ya (after the preposition istu), QAR-TAB-ya, 'groom,' and suliha-lali-ya (A. i, 15, 30). The word is found in Sch. i, Rer. 4, 5 (uemit, "cmiga), where it is also associated with a 'temple,' and probably has the same root as $u$, 'together with'; cf. the Tel el-Amarna ue, 'lieutenant,' 'viceroy', 'minister.'
23. [AN-]IM-sa te-izai mu-uraran liu(?)it, 'at the word of Sandes he is (?) for a reply,' i.e. 'he replies to the word of S.' Khand" is an adverb, though we have the aceusative in $\mathrm{A} . \mathrm{ii}, \tilde{\sim}$, governed by samlihis. These three lines may perhaps be rendered: 'Sandes invokes the Sun-god that he (?) would give (him) the Sun-god's temple . . . summoning (?) the Sun-god of the land of the House of Life (?) that he might be (his) companion (or vicegerent); to the
word of Sandes he replies at once (?), I will be a companion (?).' Ue-mi(ya) is probably the uame(.s) of the hieroglyphic texts which I have conjecturally rendered 'this,' but as its determinative is the head of a priest with the priestly staff it may really signify a 'minister.' Of course, it is possible that 1. 21 really means 'Sandes gave a temple to the Sun-god (and) addresses the Sun-god,' but as -wa in 1. 24 appears to denote the 1 st person the alternative rendering ("Sandes, "I will give the temple of the Sun-god," said to the Sun-god') is perhaps the best.
24. We find ammella in A. i, 19, ammel in A. 7 , where it may signify 'again,' 'a second time.' Tueiggas mies, 'my . . . , acc. pl. The mies implies that - . asca-wa is a 1 st pers. sing. of the verb. Ta in anta is 'thee.'
25. 'For the goddess Zagaga a temple.' The word following - asa-wa, ku-va-bi, is found again in Rev. 26.
26. . . . -ua (? . . a-sa-ua) corresponds with iddinwa in 1. 21. ITS-BAT appears to be the Ass. itsbat, 'he took.' Uwa-te is 1st pers. sing. rather than imperative.
27. 'The mighty god, the god of the eity': khalzistin, acc. sing. of an adj. in -isti- from the Ass. lihulzn. Abêmna, 'our father,' is also Assyrian. What the suffix tra means here I have no idea. ${ }^{\text {' }}$
28. Gimra-s is the Ass. gimm, 'all.' Iu-s is possibly some pronoun from which we have iya, A. ii, 23, and iyazi, Rev. 39. 'All which (?) . . . for our father Khakhkhimas took.'
29. Telibinus may have been the native name of the goddess identified with the Ass. Zagaga. The two last characters of the line are marn-yu, 'my son,'
${ }^{1}$ In the hieroglyphic texts $m i$ or $u$, which in the adverb $w a-m \hat{a}$ interchanges with wa, is added to nouns and verbs just as wa is in this paragraph. As the character means 'below,' 'under,' hee "tit-tar, I have supposed it to be merely a determinative, but from the Yuzgât tablet we may inter that it was really pronounced. Arguing from the hieromplyhic texts, abunna-wa tinu-zi would be literally 'for registration under our fither.'
rather than $i-y a$, and the line itself may perhaps begin with $[i-i d-] d i n-c a$, with which 1.27 may also commence.
30. Read [nc-]ak-li-is as in Rer. 9: in Mitannian nakki is 'to permit.' KHAR-as-zi is written KHAR-zi in the next line, 'for (?) interest.' In Rer. 19 witar means 'below.' Nai is the genitive-dative of the demonstrative, as in the Arzawa and hieroglyphie texts, of which we have the other forms non, uata, pl. nas and nat (and in the hieroglyphic texts nam and namâ). It is uncertain whether we should read KHAL-KI-in-na or KHAL-di-in-na; in the first case the translation would be 'our city' (-mma as in $a b u-u n a) . T e r i b$ is Ass., 'entrance (under, i.e. into our city).'
3I. It is possible that we should read [its-] bat. 'Stone of the elephant' must be ivory. 'The . . . ivory Khakhkhimas [has taken] for our father by way of interest.'
32. [. . . - rad AN Gulassan, 'I have . . . the daughter (?) of Gula, the supreme deity of the city.' Abie, Ass., 'father.'
33. From the termination of akir we may conclude it is an adverb. MU-ME, 'yearly'? We find im-ma in A. ii, 8. Abielum is a proper name. BAB-as Khaklikima . . . , 'the doors [belonging to] Kh.'
34. Read [AN]-IM-ni te-izzi, 'by order of the Sandian'; ef. 1. 16. With liûsi-vta cf. kî̀ssa, l. 40, and kusa-ta, A. i, 22. Does liusi-cta bis(?) satti[in?] mean 'I have married thy daughter'?
35. Nu-si khûctan tex, 'saying much to her.' In A. i, 14 nu-si is written nu-us-si. The hieroglyphic texts show that GAL-ri should be read ari, 'great' or ' great one.'
36. Probably Ass., makhar-si, 'before her.' Kha-sa-am-mi-li-as is the name of a god.
37. Ab $\hat{u}-s$, Ass., $a b \hat{u}$ with Hittite nom. suffix, 'father Khakhkhimas.'
38. Abûs khalzais, 'father of the eity,' khalzais being a formation similar to Khattais, 'Hittite,' in the hieroglyphic texts. 'Sandes the father of the state to Khakhkhimas . . . Khakhkhimmi is gen.-dat.
39. With kissiras of kissar-issi (A. i, 29), which is an adjective agreeing with the genitive Irsappa. Mis-ua may be 'mine'; for wa see footnote on 1. 27. Read ariyanda, 'greatly.'
40. Read lutu-us-sa NIN-MIES-us QAT-ZUN-[us]. The upright wedge of MES is the last wedge of NIN, as in l. 44. QAT-ZUN-us, 'hands' or 'plates' of copper occurs in A. ii, 19. Possibly there is a reference to the Egyptian weight called kat. Kíssa perhaps 'marriageable.' Damengir seems to be a proper name; perhaps [TUR]-ya Da-me-in-gir, 'my son D.'
41. For lie eibsi see above, l. 11.
42. A-ut-ti, as in Rev. 39. Marê-as mas, 'my sons.'
43. Kus-si pai-mi ; pai-mi is 'I have given,' like kai-mi in the hicroglyphic texts.

## Reverse.

1. AN EN-ZU-ua, 'the Moon-god.'
2. Perhaps $[u-i-l d a-] u-a r$; 'aw well as (the gates).' AMILLMES su-gi SAL-M[ES su-gi] is what we should supply according to 1. 37. Sugi would appear to mean ' priests,' ' male priests (and) female priestesses.'
3. In l. $9 \approx i-u-u g-g a$ is written $\approx i-u-g a$, though here there is a space between $z i$ and $u$. Amua-mas, 'a woman of the land of Annas,' mentioned by Ramses II. E-es-mi throws light on e-es-tı in A. i, 7, 10 : e-es-mi, 'may it (or she) be to me,' e-es-tu, ' may it be to thee.'
4. Sa-at is the pl. of sa, 'he.' Akik-kha-ti is Assyrian. It is possible that it represents akhâtu, 'sister,' or alihu, 'brother,' with the Hittite possessive $t i$, 'thy;' but since agha-ta and agha-s, from akiha, are used in the hieroglyphic texts in the sense of 'anew,' I am
inclined to believe that this is the signification of akhlilati here. Dakhlhum is a derivative from da, 'to get,' 'give,' and since sat is a plural it seems probable that -un marks the 3rd pers. pl. of the past tense. The suffix -aklikhu- may be causative.
5. Read na-khad-da-[ukh-]khu-un, a compound of dakhlihun (1. 4), whieh, when compared with sulkhiho-kllkhun (1.6) and serte-khkhun (l. 7), will be a derivative from da, 'to give,' 'place.' AN-MES-an agrees with neizzan; uddar is an adverb, perhaps signifying 'altogether' : cf. 1.8.
6. Khatta-ma (?) seems to be 'Hittite.'
7. In GAL-ma the suffix is the same as that of khatta-ma and kartas-ma, 1. 13. With raqqus ef. raq-qu, A. ii, 25. Nassan is a compound of the demonstrative na and the 3rd pers. pron. sa, like $u a n-s a n$ (1. 8).
8. Read AN-MES-as, as lines 5 and 10, 'the gods are together (?) decreeing (?) this.' After wan-san there is a long space, and it is possible that $k i$ or $k i-[i]$ came at the cud of the line.
9. In A. i, 17 kutedus probably means 'friendly'; see note on the passage. $-N i$ is the adjectival suffix found in Sunda-ni, 'Sandian.' -Ikiki can hardly be the relative suffix, ' like the friendliness of T.'; I think it is more probably the fuller form of the imperative suffix which appears as $-k$ in khuldk and zimnuk, A. i, 20,26 . If so, the translation here would be: - O Telibinus, be friendly, like the gods who

In this way the 2 nd pers. poss. -tan in 1.10 would be accounted for: 'at the bidding of the Sun-god, the gods in common give the mugami as thy portion.' The $g$ of mugami makes it probable that the word is Assyrian (from quamu ?). Nukkies is the part., agreeing with AN-MES-as, from the same root as nakki-tu, Chantre, ii, Rev. 7; ziugu is an adverb. The last character in the line is $k i$.
10. Perhaps we should transcribe maga-ni, since we have the adjectival mugâ-u-was in l. 13. $P a \hat{-}$-it and liu-it are here plural.
11. Read ma-va-a. Umma is Ass., 'thus,' as in A. i, 1, though it may also be ummu, ' mother.'
12. 'I, being a serf, will give to thee one sheep.'
13. We find $q u-t i$ in a similar position in Ch. i, $16 r$. 13, Rer. 10, where it follows I IM-GID-DA, 'one list,' and a meaning such as 'I inspected ' or 'collected ' or 'drew up' seems to be required: cf. the preposition qada, qatta, 'to,' 'for.'
14 . The inventory begins here. Ki-i is borrowed from Assyrian in the sense of 'as follows.' Nalitam-su, 'its cover,' is Assyrian. GUL may signify 'hammered'-'a vase of hammered copper with a copper lid.'
15. Ana nalitammi ziggate-s is also Assyrian, with the Hittite suffix $-s$, zigyate-s being the Ass. (karpat) ziqâti, 'vases pointed at the lid.' GIS-GAL, 'a door of copper.'
16. Read [GIS-a-ri-im]pa-as, as in 1. 28. 'One net (GIS-IR) of copper, one chariot of copper.'
17. I GIS-AL (?) kistas ibbias, 'one yoke (?) of white silver,' like kaśpi ebbi in the Ass. inscriptions. $1 b b i$ is borrowed from Ass., and the grammatical form is the same as that of $A Z A G$-GI-as in $\Lambda$. i, 15. The character I have read AL (?) may be intended for M $\hat{A}$, 'a boat.' The second kistas would have been followed by an adjective denoting 'dark,' corresponding with the Ass. liaśpu adim.
18. Read GIS su-u-zal-la-as. Perhaps the last words of the line are TUR GAB EDIN takkkhe-du[s], 'the small, produced in the desert,' tukikhhu being Ass. Cf., however, dakhklu-un, Rer. 4.
19. III DUK kukub istu III PU-ZUN wâtar kuitta, 'three jars made with three holes (or, perhaps better, hollow stands) below.' The kukiub or 'jar' is frequently mentioned in the Tel el-Amarna letters, and probably stood on a ring-stand.
20. Probably [i-y(a-]an-si, 'myself'; cf. Rer. 39.
21. 'A great strainer (GIS-RA), one wine-cup, one śinu-cup, one beer-cup.' 'The GIS-RA was the tube through which a liguid was poured from one ressel into another. Sinu-cen is possibly borrowed from the Ass. sinâti.

Kas-edin, 'wine of the country,' i.e. 'beer.' For the 'Beer-god ' (afterwards identified by the Greeks with Dionysos), see Ker. 32.
22. Supply [RAB ZAL DUG-]GA, 'a rabbu of good oil, a rabun (of oil) of the country, man stones, lapis lazuli, śia stones.' The rabbu was a Babylonian measure.
23. As kinânta is written kinanda in 1.33 it must be an adverb.
24. Supply [sir-ri-]ya-as as in l. 20. GI DUG-GA, 'good $\operatorname{reed}(\mathrm{s})$,' 'baskets (?) of good reeds.' Nat is the plural of the demonstrative ' these,' as in A. i, 21. Is-tu ZAL DUG-GA khar-ni-e-iz-zi, ' to be filled with good oil.' Kharné-izzi would be a gerund, 'for the filling.' The first character may also be read kin; in this case kinânta in 1.23 might signify 'fully.'
25. The character preceding $r i$ is BIT, not GAN, as is shown by Chantre, ii, Rer. 2, 5, v. 3. Qada is written qut in Rer. 27. From the Arzawa tablets we knew that it was a preposition corresponding to the Ass. ana, and here accordingly it interchanges with ала in the following line. At the end of the line we have da-[a-i], 'to be given for 2 dishes of luttia wood.' In Rev. 28 we read ana AN UT da-a-i, 'for dedication to the Sun-god,' so that da must mean 'to place,' 'set,' 'give,' dai being the dative of a verbal noun das.
26. We find kurabi in Obe. 25 ; kitucabi-ya is formed from it by the adjectival suffix -ya (" belonging to $k$. .") ; see note on Telibimu-ya, Rec. 45. If GAR is the Ass. measure, ' 1 gar of tubing' would be equivalent to 12 cubits. Nussan, i.e. nú-san, 'for it' or 'him.'
27. Unute-s, the Ass. unuti, 'furniture,' with the Hittite suffix -s; ' to be given to him in exchange for one dish as furniture.'

Qa-at na-ak-tam-mi GIS-IK, 'for the plating of a door.'
28. Ina, 'at the rate of.'
29. Read 'A GIS-GAR-GUL of copper ; 1 strainer of copper.' It is doubtful whether the next word is intended for GIS-BAR or GIS-KAK. Perhaps the end of the line should be read A-na AN [UT].
30. We should probably read ku-is tar-na. Tarna is found in Sch. i, Obv. 3, 4. The character after GIS-ma-ki seems to be $i z$. It is followed by $d a-[a-i ?]$.
31. The root of serra-ssan occurs in ser-le-khikhu, Rev. i. $N u$ TAK-ZUN śitissi . . . , 'for bright (precious) stones.' S'itissi is found in Chantre iii, 8, where it is used of stars : MUL-MES sti-ti-is-[si]. It is difficult to see what other adjective than 'bright' could be used of both stars and stones.
32. 'Three cups of wine (GESDIN-na), the set offering (MAR) for the Beer-god'; see note on 1. 21 above. At the end of the line we have $q a-[a t]$, followed perhaps by [AN UT].
33. At the end of the line we should probably read kihu-u-ma-an
34. Unu-wan-ta (mmucanda) is the adverb corresponding to the Assyrianised lit unutes of 1. 27, 'as furniture.' At the end of the line comes u-nu-va-[an-da].
30. Mân (wân) IL - lum, 'this god,' or 'this the god.' With zim-iz[zi] ef. sim-uk, A. i, 26 , where some such signification as 'provide' is required.
36. Pakilihar is the Ass. 'potter.' In pani IL-lim, pani takes the place of ana and qat.
37. Nu SAL su-gi be-el IL-lim, 'for the priestess of the lord of the gods.'
38, 39. II QAT ir-kha-a-is-si; in 1. 41, III QAT are mentioned. In A. ii, 19, 20 we read nutta QAT-ZUN-us arukhzanda assûli kharkan-clu, 'to thee the QAT I have sent plentifully for a tribute (?),' and as essar or 'copper' has been named a few lines before, we may conjecture that the QAT were
'plates' of metal. In any case the word will be the Iss. qut and qâti, 'money' (as in bit-quati, 'the treasury' ; qâti sa babi, 'gate-money'; qaśśunu ilkû, 'they took their money'); the qatûtu was a coin, a subdivision of the shekel. Cf. the Egn. measure qad. As the suffix $-i z z i$ is attached to $i r l h \hat{a}, i r k h \hat{u}$ would appear to be the Hittite equivalent of QAT, or more probably to have the meaning of 'value' ' at the rate of 2 qat.' In Chantre i, Rev. 2, however, we have ALU-Kha-iz-zi, which may be read ir-kiha$i \approx \sim i$, and a city of the name of Kha certainly does not seem very probable, though in the corresponding passige we find ALU Khattu-sipa-izzi, 'in the city of Khattu-sipa.'

BIT-IL-lim Kha-at-di-na-as-ta is important, as it clears up a passage in A. ii, 16, 17: Kha-at-ta-an-na-as SARR-us . . . di (?)-na-as-ta AN-UT-us, where we must read [MAT Khat]-cli-na-as-ta, 'the Hittite king, the Sun-god in the land of the Hittites.' In the hicroglyphic texts -nasta is similarly 'in the land of.' Here accordingly the translation will be 'in the beth-el (temple) of the Hittite land.'

Khat-ra-a signifies 'former' in the Arzawa letters (e.g. i, 17, aniyattus' . . . Khatrâes, 'thy former letters'). Khatrâ-u-izzi I would render 'in the time before me'; u denotes the 1st person in pa-u, 'I have given,' and perhaps also in $u$-dla-nzi. The whole sentence would thus be: 'in the temple of the Hittite land as was my father before me so may I myself be (?).'
40. Luksitu is Ass., from kasâdu: 'this may the lord of the gods take in the presence of the gods.' Here -izzi (in pani ilim-iz-zi) takes the place of the Ass. ina.
42. MAS-MAS-YA, 'my mage' : 'for a gift to the Sungod my mage in the dish of the Sun-god.' $N u$ MAR mu [AN KAS-EDIN], 'for a set-offering to the Beer-god.'
43. The first two characters must be read KARAN, 'wine.' As sipan corresponds to MAS-MAS in the preceding line, sipan-ti will be 'thy mage.' The word is found in B. i, 10 (si-pa-an-ti) and perhaps 8 (si-ip-pa-an).
44. 'For the dish of the goddess Telibinus.' The last characters visible in this line are GESTIN - AN, 'wine,' which would have been followed by [a-na AN UT].
45. Si-[pa-cm-]ti. Telibinu-yn must be an adjective agreeing with the dative AN-UT. SUM-san, 'I (?) have given it,' or perhaps 'them,' if -san is followed by another character.
46. ERIMMATU ZAK-LU, 'a bracelet for the right hand '; ERIMMATU GAB QAQQA-DU, 'a chain for the forehead.' NIN-MES, 'of women'; the upright wedge of MES is, as usual, represented by the last perpendicular wedge of NIN.
47. The character which follows GAL is perhaps ra.
48. Read [AN T'e-li-]bi-mu.

With the help of the Yuzgât tablet it is now possible to explain some of the passages in the two Arzawa letters, the revised text of which will be found in Knudtzon, Die zwei Arzawa-Briefe (Leipzig, 1902).

## A. i.

$\begin{array}{clc}\text { 11. ka-a-as-ma-at-ta } & \text { u-i-e-uu-un } & \text { Ir-sa-ap-pa } \\ \text { To thee } & \text { (my) servant } & \text { Irsappa, }\end{array}$
12. AMEL kha-lu-ga-tal-la-an mi-in a-u-wa-ni
messenger mine, I hare despatched,
TUR-SAL-ti
thy danghter.
13. AN-UD-mi ku-in DAME-au-ni u-wa-da-an-zi of my Sun-god to be for a wife that thou mayest give;
14. nu-us-si li-il-khu-wi-i SAM-AN RE-SI to her. I have sent in abmudance oil for the head,
15. ka-as-ma-ta up-pa-akh-khu-un I śu-kha-la-li-ya (and) for thee a written tablet (?) (and) of one ś.

## AZAG-GI-as

the gold
16. DAMQ-an-ta
as thy present.
Kasma is written kasŭma in the hieroglyphic texts. Uienu-n seems to be comneeted with ui-llar, 'along with,' and $u-e-n i, A$. ii, 3 . Uua would appear to signify 'in order that,' 'when,' though it may have merely the meaning of 'to,' as in uwa-te, 'speak to.' In this ease we should have to translate méá-danzi, 'mayest thou give to.' If uppalihliki in 1.18 signifies ' I wrote,' uppalihun will be 'a tablet'; but the root may also mean 'to present.'
17. a-ni-ra-at-tas ma-mu ku-e-da-as kha-at-ra-a-es

Thy letters to my land friendly, the former ones,
18. ub-bi wa-ra-at-mu ne-it-ta up-pa-akh-khi I have received; my answer's to thee I wrote (?) EGIR-an-da afterrurads;
19. nu-ut (sic!)-ta
to thee
am-me-el-la
again (?)
20. AMEL kha-lu-ga-tal-la-an
as a messenger.
khu-u-da-ak
allow to go,
21. na-i na-at u-wa-an-du to him these (ansters) $\left\{\begin{array}{c}\text { that I may give } \\ I \text { will give }\end{array}\right\}$

For aniyat we have DUP (?)-yat in A. ii, 5. I have borrowed the translation of ma-mu from the hieroglyphic texts. With rara-t ef. Mitamian ur'u, 'to reply.' Nêtta for mutta is diffieult to explain, but we find the same interchange of $m u$ and $n \hat{e}$ in the hieroglyphie texts.

Khaluga-tallat-tin for khaluga-tallan-tin. Khû-da-k is a compound of da and khu, which we find in lil-khúvi; the final $-k$ may be an imperative suffix. Other letters in the Tel el-Amarna collection would lead us to give the meaning of 'friendly' to the adjective coupled with 'letters.' Uucandu is for urci-du.
22. Nu-ut-ta u-wa-an-zi u-da-au-zi

To thee that thou to me (?) mayest give
ku-sa-ta TUR-SAL-ti
in marriage (??) thy danghter,
23. AMEL kha-lu-ga-tal-as messenger
mi-is
mine,

AMEL kha-lu-ga-tal la-sa a messenger
24. ku -is tu-el-ê-it na-as
being, brings (?) these
ag-ga-as
gifts;
25. nu-mu an-tu-ukh-su-us ga-as-ga-as MAT-ya-as
for me . . . . belonging to the land ub-bi-is ta-ba-as-su-un
recciring
26. zi-in-nu-uk khu-u-wa-an-da proride in abundance.

Aggas is the aqqat of the Tel el-Amarna tablets. Is gasyas the Ass. karkia(su)? The $g$ indicates Assyrian derivation.
28. nu-ut-ta ka a-as-ma bi-ib-bi es-sar up-pa khu-un To thee for a churiot of copper a plate (?)
la-li (sic!)
$I$ have sent.
Or, perhaps, ' copper as a present.'
A. ii.

1. a-ta-mu ki-[i] [te]-it Lab-ba-ya

To my lord thas says Labbaya
2. . . . me-mi-is-ta U-an-wa-an-na-as
. . . thy servant of the land of Uun :
3. is-kla-ni-it-ta-ra a-tar i-ya u-e(sic!)-ni seven times below myself(?) I bow down.
4. [nu-mu] Lab-ba-ya-an u-ul kha-a-mi

To me Labbaya verily write (? ${ }^{?}$ )
5. DUP (?)-ya-at me-mi-is-ta a-na ab-bi-wa-at-ta-an letters: thy servant to thyfather.
6. u-ul ki-it-ta-at
was faitlyful
I take the meaning of ata from the hieroglyphic texts. Of te only the upright wedge remains. The land of Uan lay westward of Aleppo according to the Egrptian monuments; from the native hieroglyphic texts we learn that it was the country called Khatti-nâ, 'Hittite-land,' by the Assyrians; the form is the same as that of Kas-uannas, ' of the land of Kas,' in the hieroglyphic texts. The signification of 1.3 is that demanded by the other Tel el-Amarna tablets: -tara would be the suffix of the numeral adverb, and throws light on the suffixes of mi-dar, wa-tar, ut-tar. Atar is for watar. For ueni, see above. Abbi for abi, as often in Ass. Kittut is from the Ass. kittu. Dr. Knudtzon tells me that a fresh examination of the tablet makes him doubt whether DUP is possible in line 5.
10. nu-mu [D.P.] Lab-ba-ya-an EGIR-pa khat-ra-a

To me Labbaya after the former one
11. is-tu AMEL as (?)-su (?)-mi-ya li-li-wa-akh-khufrom among the enroys (?) mayest thou send u-an-zi
abundantly
12. na-i PIS-un-na-nulu me-mi-an ab-bi-aś of this $\quad m y . . . \quad$ the servant $(s), O$ my father,
13. EGIR-pa kha-at-ra-a-i after the former ones.
14. Ki-i gan ab-bi ku-is es-sar-[an] As in the time of my futher being, the copper.
15. khal (sic!)-za-i-na-an an $\mathrm{pa}-[\mathrm{it}]$
of the land of the city, uthich gives
16. Kha-at-ta-an-na-as SARR-us the Hittite king,
17. [MAT Khat]-di-na-as-ta AN-UT-us in the Hittite land the Sun-god,
18. as-su-u-li pa-akh-ta-an-ta-ki (?)
I have sent as (?) thy present:
19. nu-ut-ta QAT-ZUN-us a-ra-akh-za-an-da to thee the money completely
20. [as-su]-u-li khar-gan-du

I have sent for tribute (?).
Gan-an-da in A. i, 5 corresponds to 'for ever' in the Ass. texts; hence gan will be 'time.' Pakitan-ta seems to be the equivalent (and therefore the phonetic reading) of DAMQ-an-ta in A. i. $A n$ is the acc. of the relative pron. in the hieroglyphic texts.

With the exception of Chantre, $i$, the Boghaz Keui texts are too fragmentary for explanation. Chantre, i, however, is as follows, according to the revised version of Dr. Pinches:

Obyerse.
1.
. . . te (?)-ki-il

Khibburis may be the classical Ibôra. Arinnas is 'of the land of the king'; ALU arimas, 'royal city.' Khattu-sipas, 'Khattu the mage.' Tawas may be Tavium. With Alisas and Khaddisatum cf. the classical Aliassos and Khadisia. Amas is mentioned in an Assyro-Cappadocian tablet from Gyül Tepé. Miquttu-n is the Assyrian miqtanu and muqnthu. In Obv. 16 the final character may be nir , lul, sum, or kis, or some ideograph for 'tribute '- 'the tribute of the city.' Qumê-izzi is explained by SAL Qumi-y/a 'a woman of Qumi ' in Ch. ir, 6. Qumi can hardly be the name of a city, as in that case it ought to have the determinative of 'city' in Ch. i, Rer. 3, but would rather be the name of a district, and I therefore see in it Koma-na, 'the land of Qoma,' written Quma-ni in the Assyrian inscriptions.

Ch. iii is an astronomical tablet. In the first paragraph are two broken lines of introduction, then come four paragraphs enumerating in order the months Ni-[śan?], As-ti-*, and Mi-*, which will therefore be the names of the first three months of the Hittite year.

The Arzawan noun ended in -s in the nominative singular, though this was frequently dropped in proper names, and in $-n$ in the accusative, the genitive-dative case being expressed by a vowel ; -sa denoted a case of dependeney and probably also the vocative (see Rer. 9), -ta the locative, -ki the relative, $-l$ the illative. Other suffixes were -izzi, corresponding to the Ass. ina or ina pani, and $-z i$, which seems to become -nzi in iya-nzi. The nom. and ace. pl. terminated in -as and $-n s$, as well as in $-t$ or $-l$, but the relation between the two terminations is not yet clear. -an appears to have been the suffix of the gen. pl.; see Rer. 5 . In Kartas-ma, 'of the land of Kartas,' we have the -ma of the hieroglyphic texts. The relative -ki could be attached to the plural, e.g. Khatreski, 'like the former' (A. ii, 25), and in local names the final $-s$ of the nom. was retained before -ta and -ma, as in Khaddi-nas-ta and Kartas-ma; ef. also kihalzi-s-tiu. The suffixes $-y a$ and $-s i$ (and -sa) were adjectival, meaning 'belonging to,' 'son of,' ete., the first of them being able to take the place of the genitive-dative ; so too was the suffix -ure (e.g. khatri-was, Chantre, vii, 8, 11 ; muga-u-was). -Ňa signified 'of the land of,' locality being also denoted by the simple $-a-i$ (as in khalza-is) and -sti (as in kihalzi-stin). By the side of -na we have -ni, as in Saudu-ni (AN-MM-ni), 'to the Sandanian.' Another suffix was -ma, as in Thkelikhi-mas and lihuk-mu-us, as well as -me or -mi, as in assu-mi-ya, ladi-mi$y a$, ara-mis, and words like uarsu-las make it probable that there was' a suffix -la ; cf. Vannic eri-las, 'king.' As a rule, the governing word followed the governed, but the adjective might follow its substantive.

Isilhen signified 'seven'; the numeral 'nine' also terminated in -an. The numeral adrerb was denoted by -tara, which is probably identical with the adverbial suffix -tar.

The personal pronouns were: mi and mu, ' of me,' 'to me'; ta, ti, tu, 'of thee,' 'to thee '; sa, ' of him,' ace. san, si, ' of her,' ' to her.' It is possible that the 1st pers. pron. might be prefixed to the verb under the form of $n$, as in $u$-dunzi, ' that thou mayest give me.' At any rate, kihatia $\hat{-}-u$ $i z z i$ appears to signify ' in the time before me' (Rec. 38,
39). The possessive pronouns were: mis or més, pl. mîs, 'mine,' gen.-dat. mi (mu), acc. min; tas, tis, 'thine,' gen.dat. tu, ti, tu, acc. tan, tim, pl. tâs; sas, 'his.' Sis, 'hers,' has not yet been fomad. It is possible that iya, iya-zi, iyn$n z i$ is 'myself.'

There are two demonstratives: (1) wân (written mân and $b \hat{a} n$ ), 'this,' almost always at the head of the sentence and used as an acc. sing., and (2) nas, gen--dat. nai, ace. nan, pl. nas and nat. Both demonstratives may be combined with the ace of the 3rd pers. pron. wan-san and nas-san for nan-sam. The ace. of the relative pron. is an.

The prepositions are: (1) $m u$ (once written $n \hat{e}$ ), 'for,' originally' a nown signifying 'a gift'; (2) kasma, 'for the sake of,' originally, according to the hieroglyphie texts, signifying 'work'; (3) qadn, qat, qatta, 'to.'

The usual adverbial suffix is -(ı)uda, also written -uta. But there is also another adverbial suffix -tár or -lâr found in ui-lar, 'along with,' ul-liar, 'together,' râ-tar and a-tar, 'beneath'; while duqqa, 'in return,' and raqqa, like imma, 'now' (?), and ammella, ammel, 'again,' show that certain adverbs terminated in $-a$. I have detected no traces of a copulative conjunction. The intensive particle $\hat{u} l$ gives a past sense to the present of the rerb. Uura means perhaps 'in order that' (though originally an adverbial preposition like the English 'for'), and is used with the optative of the verb; the suffix of the 2nd pers. sing. of the optative could be attached to it (muca-nzi).

The lst pers. sing. of the aorist was denoted by the suffix $-i$, as well as by -mi, as in pai-mi, and the 3rd pers. pl. by $-u n$; the 1 st pers. sing. of the future by $-u$ (e.g. $p a-u$, ' I will offer,' unca-n-du, 'I will give'); the 3rd pers. sing. of the present by -it, as in teit, 'he says,' pait, 'he offers,' kuit, 'it is.' The 3rd pers. pl. of the present has the same form ; see Rer. 8. The 2nd pers. sing. of the optativeconjunctive ended in $-(a) n z i$, e.g. udanzi, liliucakhlhuanzi. This form may originally have been that of a gerundive. It is probable that the future and the optative had the sameforms ; cf. A. i, 21 and 22. A perfect sense could be given
to the forms of the present by prefixing to them the intensive particle $\hat{u} l$. The imperative ended in the rowel of the stem, e.g. khami, 'write,' or had a suffixed $k$, e.g. lihuda-k, 'let go,' zinmu-k, 'provide' (?), which probably appears as -ikki in Rev. 9 . The relative ki could be added to verbal forms (e.g. liut-ki) as well as to nouns. The substantive verb possessed peculiar forms, ês-mi, 'may it be to me,' ês-tu, 'may it be to thee.' In Obv. 18 aliku-s is probably the 3rd pl. of the aorist, 'they loved' (?) ; ef. Mitamuian aggu-s, 'friend,' agu-kara, 'love.' There was a lst pers. sing. in -wa of some tense as yet undefined with certainty ; see Obc. 24, 32, 34 (kusi-un, 'I have (? ) married').

Much use was made of the part. pres. in the nom. ; e.g., dais, 'giving,' teis, 'speaking,' kuls, 'being.' In Rev. 9 naklies is a nom. pl. The verbal noun frequently took the place of the verb itself; thus we have dâi, 'for the giving,' 'to be given'; te-izai, 'at the order'; kharnê-izzi,' 'in the filling.' There was also a pass. part., kuitta, 'made,' takhlihu$d a, ~ ' p r o d u c e d '(?)$.

The personal pronouns could be affixed to the verbal forms, e.g. lâbênis-san.

Composition was possible; thus we have nakha-delakilikhu. The verbal suffix kiklihu in words like clakhkhu-n, ser-tekhhu-n, uppa-khkhu-n, is still unexplained, but may be causative.

I have only to add that Telibinus was the name of the goddess of Arzawa, who was associated with the local Sun-god. She is called merely Atus, 'the queen,' in the hieroglyphie texts. The native names of the three first months of the year seem to have been Ni[san], Asti . . , and Mi . . .

Between the Arzawan grammar and that resulting from my decipherment of the hieroglyphic texts the differences are but slight, as will be seen by a reference to my recent paper, "The Hittite Inscriptions Translated and Annotated." I have not yet detected in them the relative -ki (which is of Assyrian origin), the illative $-l$, the adjectival -stis, the adverbial -tar, the imperative $-k$, and the intensive $\hat{u} /$. But
there are curious coincidences in isolated forms that cannot at present be explained ; thas, the peculiar abbi-ua(n), 'father,' of A. ii, $\overline{5}$, is paralleled by some accusatives in -rom, and ne is found by the side of nu.

Between Arzawan-IIttite and Vamnic there are striking points of agreement in grammar and vocabulary. Thus the cases and suffixes of the nom are for the most part alike; $d a$ is the Vamnic du, te the Vamnic $t i$. But it is with Mitamian that the agreement is closest, extending even to such remarkable coincidences as that between Arz. wara(s), 'a reply,' and Mit. urn, 'to answer.' Linguistically ArzawanIIittite, Mitannian, and Vannic belong to the same family of speech. That Arzawam, or rather Hittite, should have influenced both Phrygian and Greek in grammar as well as vocabulary is only what we might expect.

## YOCABULARY.

[Obr. means the obverse and Rev. the reverse of the Yuzgât tablet; A. i and 1. ii, the two Arzawa tablets as edited by Kuudtzon, Die zucei Arauca-bracfe; C., the texts published by Chantre, Mission en Cuppoloen, pp. 46-5̃6, as revised by Pinches; S., the two Boghaz Keni texts published by Scheil in Chantre's Mission, pp. 58-61; B., a fragment from Boghaz Keui published by Belck in Anatolia, ii.]

Ku-ku-ub-[ZUN], 'jars.' Rer. 19, 32.
Ku-na-an-za. Obc. Ј, 6.
Ku-us-sit, ' marriageable (?).' Obr. 40.
Ku-sia-ta, ' in marriage (?).' A. i, 22.
Ku-u-si-wa, 'I married (?).' Obe. 34.
(KITU) Ku-si-it-tin, 'shawl' ace. A. i, 32. A.ss.

Ku (?)-wa-a. Rec. 11. See ma-wa-a, 'here (?).' Ku-wa-bi. Obe. 25.

Ku-wa-bi-ya. Rer. 26.

## KH.

Kha-batan. 13. 4.
Kha-ad-di-su-tum, a city. C. i, Rev. 1 ; ef. the classical Khadisia.
Kha-ad-du-sa-as-sa. A. i, 27. See $m u-k h$.
(ALU) Kha-ag-ga-mi-is-si-ya-il, from the city-district of Kh.' C. i, Rer. 7.
(ALU) Kha-iz-zi, 'in Kha.' C. i, Rer. 2.
Kha-akh-khi-ma-as, a proper name. Obr. 9, 1г, 26, 28, 31, $34,37$.
Kha-akh-khi-ma-[nis ?], 'belonging to.' Obr. 33.
Kha-akh-khi-im-mi, dat. Obv. 38.
Kha-lit-as. Rec. 6.
Kha-la-mu-ut, 'he seals (?).' Obr. 8. Or lika-at-nu-ut.
(ALU) Khal-la-bi-ya-il, 'from the city-district of Eh.' C. i, Obr. 9.

Khal-lim. S. i, Rer. 3.
Khal-su-wa-an-ni. S. ii, B; cf. hier. suanna, 'house.'
[AMIL] Kha-lu-ga-tal-as, 'messenger.' A. i, 23, 29.
Kha-lu-ga-tal-la-an, ace. A. i, 20.
Kha-lu-ga-tal-la-at-ti-in (for -n-tin), 'thy m.' A. i, 19.
Kha-lu-ga-tal-la-sa. A. i, 23.
Khal-za-is, 'belonging to the city.' Obr. 38. Ass. khaltsu.
Khal-zi-is-tin, 'of the city.' Obe. $27, \therefore 9,32$.
Khal-za-kis (?), 'among (?) the cities.' C. i, Obr. 15.
Khal-za-i-na-an, ' of the land of the city.' A. ii, 15.
Kha-mi, 'write.' A. ii, 4.
(ALU) Kha-am-mu-khi-ya-il, 'from city-district of Kh.' C. i, Obe 11.
(ALU) Kha-am-mu-na-a-il, 'from city of Kh.' C. i, Obr. 18.
Kha-an-da. Obr. 23.
Kha-an-da-an. A. ii, .
(KITU) Kha-ap-pa . . , a garment. A. i, 33.

Kha-ra-a. C. ii, Rec. 3, Obv. 6.
Kha-a-ra-as. S. i, Rev. 2.
Khar-ak-ta. Obr. 25. Perhaps KHAR-ak-ta.
(ALU) Khar-as-tal-a-il, 'from city of Kh.' C. i, Obr. 7.
Khar-kan-du. A. ii, 20.
(ALU) Khar-khar (?)-a-il, 'from city of Kh.' C. i, Rev. 9.
Khar-ni-e-iz-zi, 'filled.' Rer. 24.
Kha-sa-am-mi-li-as, a deity. Obv. 36.
Kha-as-si-i. C. vii, 7.
Kha-as-si-ya-ta. C. ii, Rer. 5.
(TUR) Kha-ta-an. S. ii, 5. See Khat-ta-ma.
(ALU) Kha-te-te-na-a-il, 'from city of Kh.' C. i, Obr. 18.
May also be read Kha-as-ma-as-ma-na-a-il.
Kha-at-nu-ut. See Kha-la-nu-ut.
Kha-at-ra-a (Khat-ra-a), 'former.' Rev. 38; 1. i, 20, ii, 10 ; B. . .

Kha-at-ra-a-i. A. ii, 13, 22.
Kha-at-ra-a-es. A. i, 17.
Kha-at-ri-es-ki, 'like the former.' A. ii, 25.
Kha-at-ri-wa-as. C. vii, 8, 11.
Kha-at-ta-ma, ' of the Hittite land.' Rev. 6.

Khm-u-m1(w)a-au-da, 'abundantly.' A. i, '26.
Khu-u-da-a-ak, 'multiply;' 'cause to go.' A. i, 20.
Compound of da.

Khu-uk-ma-a-us, 'stored (?).' Rer. 3 ', 41.
Khu-uk-zi, Rer. 38, 41.
(ALU) Khu-[ul]-la-ra-a, 'city of Kh.' C. i, Obr. \&.
Khu-ra-a-te. C. ii, leer. ii.
(GIS) Khu-u-wa, a wood. C. vi, S.
Khu-u-wa-as-sa. C. vi, 9.
(KITU) Khu-uz-»i, a garment. A. i, 32.

## L.

Lab-ba-ya, proper name. A. ii, 1.
Lab-ba-ya-in, aec. A. ii, 4, 10.
La-a-bi-in. S. i, Obe. 3, 8; ef. DAMQU-in.
La-a-bi-e-ni-is-sa-an, ' . . . ing it.' S. i, Obr. 7.
La-a-di-mi-ya. S. i, Obr. 3, 6, 8.
La-li, 'I sent.' C. i, Obr. 15; S. i, Obr. 5; A. i, 28. See assûli.
La-pa-a-at-ta, 'thy . . .' C. ii, Obr. 6.
Li-e, 'for a tablet.' Obc. 11, 41; S. i, Obr. శ. Ass.
Li-il-khu-wi(wa)-i, 'I have sent mueh.' A. i, 14. Compound of lil and khu.
Li-li-wa-akh-khu-u-an-zi, 'mayest thou send much,' A.ii, 11.
Li-ip-pa. See Sal-li-ip-pa.
Lu-uk-si-ta, 'may he take.' Rev. 40. Ass. from kiusâdu. (GIS) Lu-ut-ti-ya. Rev. 25.
Lu-u-wa-ri. Obr. 31.

## M.

Ma-mu, 'to my land.' A. i, $1 \tau$; cf. mc-uâ.
Ma-khar (?). Obr. 36, Rer. 25. Perhaps Ass. makhar, but cf. nam-ma-za.
-ma-akh-khi-ta-an. Rer. 10.
(ALU) Ma-la-az-zi-ya-il, 'from city-district of M.' C. i, Rer. 8.
M(w)a-a-an. Obr. 15, Rer. 11, 35, 40 ; C. i, Obv. 14; S. i, Obr. 7. Also written ba-a-an.
Ma-a-an-sa-an. Compound of wân and sa. Rec. 9.
Ma-as-ta. Obr. 14. See nu-masta.

Ma-as. Obr. 42. Sec mis.
Mas-si-ya. C. vi, 10. In Rev. 42 Dr. Pinches reads mas-si-ya. (ALU) M(w)a-ti-ik-sa-il, 'from city of M.' C. i, Obr. 9. (ALU) $M$ (w)a-ti-il-la-ra-il, ' from city of M.' C. i, obr. 8 .
Mat-wa-a, 'here (? $?$ ).' Obr. 19. See liu(?) $r$ â, and cf. ma.
Me-khar-ma. Rev. 36.
Me-mi-is-ta, 'thy servant.' A. ii, 2, 5.
Me-mi-an, acc. A. ii, 12.
Mi, ' of me,' 'to me.' A. i, 3, 4, 5.
Mu, 'of me,' 'to me.' Obr. 4 ; A. i, 17, 18, 25 ; A. ii, 1, 10, 12.
Mi-e-es, 'mine.' Olr. 24.
Mi-is. Rev. 6, 20 ; 1. i, 23 .
Mi-in, ace. A. i, 12.
Mi-is-wa. Obr. 39.
Ma-as, pl. Obr. 42.
Mi- . . , third month of year. C. iii, 12 .
. . -mi-ti-li-is, 'a . . mitilian.' C. iv, $10,11$.
Mi-ta-wa. Obr. 41.
Mi-qat-ta-an, 'deficit.' C. i, Rer. 3. Ass.
[MA'T] Mi-iz-za-ri, Egypt. A. i, 1.
Mu. See mi.
[KITU] Mu-as-tal-li-ya-as-sa-[an], a garment. A. i, 34.
Or Zir-tal-. Perhaps named from the city of Mustilia.
Mu-gr-m(w)i. Rer. 10.
Mu-ga-a-u-wa-as, adj. Rec. 13.
Mu-ri-c-ni. S. ii, 9, 10.
Mu-1z-r[i], Egypt. C. i, Rer. 1.

## N.

Na-i, ' of this,' ' to this.' Obr. 30 ; A. i, 21, ii, 12.
Nit-in, ace. Obr. 6 ; A. ii, 15.
Na-as sa-an, for nan-san. Ree. 7 ; cf. mân-san.
Na-as, acc. pl. A. i, d.
Nat-at, pl. Rer. 24; A. i, 21; S. i, Obt. 12.
Na-khad-dat[akh]-khu-un. Rer. j; ef. nulihaddusassa.

Na-ak-ki-es, ' permitting (? ?).' Ret. 9.
[Na]-ak-ki-is. Obr. 30.
Na-ak-ki[-tu]. C. ii, Rer. 7.
Na-ak-tam-mi, ' cover.' Rev. 15. Ass.
Na-ak-tam-su, 'its cover.' Rec. 14.
. . -na-an-si-is, 'a . . nansian.' C. iv, $8,9,12$.
. . -[na]-an-si-in. B. 13.
. .-na-az-mi-sal. Rec. 11.
Ne-es-ra(?)-ni. A. ii. 25. Probably Ass.
Ne-it-ta, ' to thee.' A. i, 18. For mu-ta; cf. interchange of $m i$ and $m u, t i$ and $t u$.
Ni-mu-ut-ri-ya, Neb-mâ-Ra. A. i, 1.
Ne-iz-za-an. Rer. 5.
Ni-[san ?], first month of year. C. iii, 5, 7.
Nu, 'to,' 'for.' Obe. 4, 10, 23, 26, 28, 31, 3.3., Rer. 11 , 31, $32,37,42,44$; A. i, 14, 22, $2 \overline{5}, 2 \tau(?), 28$; A. ii, 7 , 10, 19, 25 ; C. i, Obr. 15, Rev. 2; S. i, Rev. 5. Probably from nûs.
Nu-mu, 'to me.' A. ii, 10, ete.
Nu-us-satan, 'for him.' Rec. 26.
Nu-us-si, 'for her.' A. i, 14.

It will be noticed from an examination of this rocabulary that Arzawan phonology aroids the sounds of $g$ and $b$. All words beginning with $g$ and most of those which contain $g$ are prima facie of Assyrian origin, and the same holds true to a large extent of words begiming with or containing $b$.

## POSTSCRIPT.

The recent diseoreries of the German explorers at Boohaz Keui have an important bearing upon the inscriptions here dealt. with, and Professor Sayce's contention that Assyrian words ocemr therein wrould seem to be fully justified. According to Winckler, who is a member of the German expedition, the native name of Boghaz Keui was Hatti, apparently the chief city of the country of that name, one of its great kings being Hattu-sili, commonly known as Kheta-sir, the ruler who made a treaty with Rameses II. It is therefore the language of the Hatti, illentified with the Hittites, which is presented in the inscription forming the subject of the foregoing pages. In the texts in that tongue found by the German explorers, the seemingly Assyrian prepositions ana, istu, again appear, with expressions like $a b u-i a$, ' $m y$ father,' abi abi-ia, 'my grandfather,' and isbat, 'he has conquered,' thus justifying Professor Sayce's identifications. Including the verbal form (see p. 70), these and other worls seem to have been used merely ideographically, like the numerous sumero-Akkadan expressions in Assyro-Babylonian. All students of the history of the Nearer East will look forward to the publication of these remarkable texts, as well as to the Babylonian rersion of the treaty with Rameses II., the importance of which it would be difficult to overestimate.

[^0]:    1 J. A. Knudtzon, Die zwei Arzaua-Briefe, pp. 41-44, 59 f., 100, 103. (See pp. 19-22 of this present paper.) Chantre, Mission en Cappadocie, 1898, folio.
    " See pp. $51-72$.

[^1]:    1 This may be an Assyro－Babylonian word．
    ${ }^{2}$ Apparently a wooden object．
    ${ }^{3}$ Perhaps the same word as tinuzi，below．

[^2]:    ${ }^{1}$ Followed in these passages by $-p i$ or $-w a$.
    = Probably a preposition.

[^3]:    ${ }^{1}$ Many other readings are possible.

[^4]:    ' Ins.j occurs, however, less doubtfully in the letter from Amenophis III, translated by Knudtzon. There it appears written thus: iA 领- - i.e. the word $i a y$ ' with the usual determinative prefix for 'country.' This, however, may be the word miriaš, 'earth' (above), expressed by means of th with two phonetic complements, but the comparison with Cassite is nowise invalidated by this substitution.

[^5]:    ${ }^{1}$ Perhaps the same as sindi in the name Sindi-Sugab, which would in that case mean 'gift of Nergal,' or the like.

[^6]:    1 Instead of -man, the Tel-el-Amarna tablet marked $b$ by linudtzon has $-m i \mathrm{for}^{\prime} \mathrm{my}$.'

[^7]:    1 Whether the coupling of Amurrū and Kaňin by Nehuchadnezzar I. (about 1120 в.c.). Who calls himself "subduer of the land of Amuru, spoiler of Kašin," can also be adduced as an argument for western placing of the Kassites, remaius to be seen.
    ${ }^{2}$ It is needless to say that there is much in the reudering which is doubtful, and it must therefore be taken with all reserve.
    ${ }^{3}$ The first two lines are in Semitic Babyloniau, but do not give quite the usual formula.

[^8]:    ' Knudtzon translates 'for mys son,' i.e. the son of Amenophis III., but the characters prececting the possessive pronoun are those used for the solar deity, who 11 this case must be the Pharaoh himself, whom Iršappa would naturally refer to as his Sun-god.
    2 Lit. 'that thom mayest be pleased, satisfied,' if the same ideograph in 1. 6 and 12 be correctly translated.

[^9]:    1 kušata.
    ${ }^{2}$ Either thus, or the word miria.s indicated by au idcograph and phonetic complements.

[^10]:    1 That is. the secomd Arzawa tablet as published by Kinultzon.
    ${ }^{2}$ Hr. Kinudtzon questions whe ther the character preceding na in the Arzawa tablet can lee di. hat the traces of it wheh he has sent me resemble the form somethmes assmod hy the charater di in the Vagait text, and it is pussible that the dirst character in the line is the determinative mat, 'country.'

[^11]:    1 The two last words of the phrase correspond to the hieroglyphic (Farta)sma amma-us.

[^12]:    ${ }^{1}$ A tablet belonging to the Rev. Dr. White contains the words: GAN-na-a GESTIN pa-iz-zi, 'a garden of vines by way of a gitt': SARRU-is' (aramis') pait sab-zi, 'the king gives'; the name of the city Ne-ri-ik-q2-ser-ru; and a mention of 'the son of the king of Gan-dakh-khi . .'

[^13]:    ${ }^{1}$ See 1. 10, end.
    ${ }_{3}^{2}$ Or part of another character ending in the same way (? zi).
    Or numarat.

    - Muted or musel.
    ${ }^{5}$ See l. 20 (the second word).
    ${ }^{6}$ Or ' vers,' or 'very much.
    ${ }^{7}$ giśsistr mi-a.

[^14]:    Or -wa.
    ${ }_{2}$ Or $i s(s, z) m i t-(t, d)$, or $i s(g, z)-b e$, or $\left.i s(s, z)-t i\right)$, or $i z z i z$.
    ${ }^{3}$ Compare line 21.
    ${ }_{5}{ }^{4}$ Or -mit, or $-t i l$, or - siz (see the note to lines 21 and 28 ).
    ${ }^{5}$ There may he nothing lost hetween imma and akur.
    ${ }^{6}$ Or, possibly, ma (to my hrothers).

[^15]:    Or EN－ZU－NA may have bad in the language of the tablet the common pronusciation of Sin，supposed to be a corruplion of $Z_{11-\mu \text {－}}$
    ${ }^{2}$ Compare dār in line 5 ，uddur in 11．8，10，and undir̀ in line 8 of the obverse．
    ${ }^{3}$ Ur $n i(z u k-n i-t a)$ ．
    ${ }_{5}^{4}$ On the original this syllalle looks as though it belonged to ku－it．
    ${ }^{5}$ Or as，ass．
    ${ }^{6} \mathrm{Or}$ tul．
    ＊Possibly a receptacle of bronze wire woven like a basket．

    FPerhaps to be completed mu－ga－a－u－чсa－ab．
    
    （11）Ib＂and＂1 are writ
    Is＂and＂are written eluse tugether，with a damaged portion between．They mast，therefire，furm one character，in which case we ought，perhaps，to read sir，making the word sir－ri－in－ns．
    ＂1＇Wine of the plain，＇perhaps really a geographical expressiou，＇wine of cllima．＇i．e．Babylonia．（Delitzachi identifies relma with Eden．）
